

INSTALLATION OF WATER METERS FOR NEW CONNECTIONS

On January 25, 2005, the BMID Board of Trustees passed a resolution requiring that all service connection changes and new connections shall have a water meter installed complete with a remote readout. The cost of the meter, remote readout and its installation shall be borne by the owner, payable at time of Application for Water.

The revised and current costs for meter installation are as follows:

5/8 " Meter	\$ 435.00 installed
3/4 " Meter	\$ 435.00 installed
1" Meter	\$ 510.00 installed
1-1/2" Meter	\$ 1,400.00 installed
2" Meter	\$ 1,640.00 installed

Please note: the costs quoted above are for new building installations. Due to existing physical constraints, costs to install meters within existing buildings may be higher than the prices listed.

The meter will be owned by BMID and the cost and responsibility for maintenance of the meter will be the responsibility of BMID. The meter operations and readings will come from toll revenue.

Please find attached the specification for the meters and the readout and what will be required from the builder/plumber. Corix Utilities Inc. will be the supplier and installer of these meters.

Please Note:

The contractor's plumber is responsible for **faxing Corix at 765-6831** for the meter installation after the City of Kelowna plumbing inspector has given final approval of the plumbers work.

Or phone Corix Utilities Inc. at 765-3826 to arrange for meter installation.

Water toll rate will be as per current toll bylaw. Per Black Mountain Irrigation District Board of Trustees.
